

Appendix F

Treatment Settings: Definitions

Acute

Includes inpatients and outpatients of an acute care facility (e.g. medical, surgical, mental health), or seen in the acute service post-discharge as follow-up to an acute episode of care e.g. Hospital in the Home, post-acute care or similar programs delivered in the patient's home.

Sub-Acute

Includes inpatients and outpatients of a sub-acute care facility e.g. rehabilitation hospitals, geriatric and evaluation management units, step down transition and interim care units, and post-discharge programs such as Rehab in the Home and similar.

Community

Includes community health centres, community mental health centres and primary health care.

Residential

Residential aged care facilities
